

Installation Instructions for Windows Vista

1. Install M-II Manager.

Double click the M-II Manager Setup file within the MII Manager folder to begin setup. After the install begins click Next, Next again to install to destination folder APPS\M-II Manager. Click Next again to perform the setup and lastly click Finish to complete the setup.

2. Install M-II Drivers.

Double click the Setup file within the MII Driver folder to begin driver installation. The install will begin and shortly after it will finish asking you to restart your computer. Leave the "Yes, I want to restart my computer now" dot checked and click Finish to reboot.

After your computer reboots follow the User's Guide manual sent with your MII Flashcam - refer to page 20 section 4.1.1 "Setting up the Software".

Thank you.

Some Antivirus & Firewall Software will conflict with downloading video/pictures from your MII Flashcam to your Computer. If there is an issue you will receive a "Bulk I/O Error". In order to avoid this you must stop all antivirus & firewall processes while downloading.
